

SET Index Performance	
Close (21 Sep.)	1,670.49
Change	-0.16
Value	54,494
Support 1	1665
Support 2	1660
Resistance 1	1675-1680
Resistance 2	1685

Indicators	
RSI(14)	88.17
Modified Stochastic	89.82
MACD	22.62
DI+/DI-	41.46/5.23

- The SET index closed in negative territory, accompanied by a sell signal from Modified Stochastic on the 60-min chart. MACD remains trapped under its signal line, providing scope for a downward breakout of the trend channel.
- However, in a neat term, the SETI looks to be in a sideways correction, with a support level seen at 1665 points and resistances at 1675-1680 points. It is better to wait for a buy signal before going back in.
